

NEWS RELEASE

POWER STATION LLC INSTALLS the POWERPORT at SAN FRANCISCO INTERNATIONAL AIRPORT

BREA, Calif., Aug 24/PRNewswire/-Power Station LLC

Power Station LLC announces the installation of the PowerPort in Terminal 3 at San Francisco International Airport (“SFO”). The PowerPort is the only product of its kind, combining four necessary services in six configurations; Internet access, wireless computer rental, portable, wireless power (ChargePads), and Wi-Fi hotspot Internet access. The PowerPort also offers convenient walk-up stations providing WebPower and WebPad services to travelers who can spare just minutes, and yet need email or Internet access. The PowerPort is designed to serve all configurations of traveler; those with equipment, and those without, people with time to enjoy the convenience of using wireless equipment in comfort, and those with only minutes to spare.

The PowerPort became active opposite gates 84 and 85 in Terminal 3, and was quickly initiated by customers.

Asked to comment on the installation, Henry Mauriss, chairman of Power Station, said “This PowerPort installation is meaningful in many ways; it was gratifying to witness how quickly customers began to use the machine, and it is fitting that the PowerPort debuts in a world-class airport that is SFO. Management at SFO and SBC Communication were quick to recognize the value and passenger need for the PowerPort-enough so to help us place it Terminal 3, where United Airlines enplanes over 50% of SFO’s annual passenger traffic. We’re looking forward to the many PowerPort installations now slated over the coming few months, and look forward to expanding its presence at SFO by the end of the year”.

The PowerPort at Terminal 3, SFO, July 28, 2004

Power Station LLC is a consumer product design and service company which has developed the PowerPort for installation at airports and other strategic sites. The PowerPort delivers a full suite of services including a convenient means of charging laptop computers, wireless WebPads for use in accessing the Internet, Wi-Fi Internet access for wireless users, ChargePads for use as portable batteries for laptops, walk-up power and Internet access, and business center management.
