

NEWS RELEASE
POWERPORT DEBUTS AT 2005 INTERNATIONAL CES

BREA, Calif., Jan 11/PRNewswire/-Power Station LLC

Power Station LLC was pleased to debut the PowerPort at the Consumer Electronics Association's 2005 International Consumer Electronics Show held at the Las Vegas Convention Center from January 6th to January 9th. The International CES is the largest annual consumer technology show in the world, drawing an estimated 300,000 people. Convention attendees were able to liberally use all the PowerPort's services and the machine performed flawlessly and well above modeled expectations. Importantly, the device attracted an especially technical audience, many of whom openly complemented the PowerPort and were quick to spread word of its installation.

Matt Buscher, President of Power Station, was present at CES and commented: "I was delighted at how well utilized the PowerPort was during the show. Every one of its devices was sought after, with a good number of customers being tradeshow people needing access to the Internet at reasonable pricing. This was an important success as it is the first convention center installation for us. With these results, we look forward to bringing the PowerPort to Anaheim, Los Angeles and Washington in just the next few months".

The PowerPort at CES, January 7, 2005

Power Station LLC is a consumer product design and service company which has developed the PowerPort for installation at airports, convention centers and other strategic sites. The PowerPort delivers a full suite of services including a convenient means of charging laptop computers, wireless WebPads for use in accessing the Internet, Wi-Fi Internet access for wireless users, ChargePads for use as portable batteries for laptops, walk-up power and Internet access, and automated business center management.
