

NEWS RELEASE
POWERPORT SERVICE COMES TO
MINNEAPOLIS/ST. PAUL INTERNATIONAL AIRPORT

Brea, CA, November 30, 2005 / PR Newswire / Power Station, LLC

Power Station LLC and the Metropolitan Airports Commission (MAC), operators of the Minneapolis/St. Paul International Airport, are pleased to announce the Grand Opening of the latest PowerPort installation on this date. Located in the Service Center adjacent to Gate 21 in the C Concourse of the Lindbergh Terminal, the PowerPort is the only product of its kind. In a single location, it offers Internet access; secure battery charging for laptops, cell phones and other electronic equipment; portable power rental; and the rental of laptop computers. People with time to spare can rent equipment and work at their leisure in the Service Center, or stop and use a computer while they dine. Those in a hurry can log on, do their essential business or check their e-mail, and be on their way.

Vicki Tigwell, Chairperson of the MAC, had this to say, “We are delighted to add the PowerPort to our award-winning complement of concessions in the Lindbergh Terminal. The Commission is always looking for new ways to make travel more convenient, more productive and more enjoyable for our customers.”

Henry Mauriss, Chairman of Power Station, said, “It is extremely gratifying for us to add the Minneapolis/St. Paul International Airport to the growing list of airports that we serve. This is a world-class hub with a good mix of connecting and local passengers. We believe that MSP will be an excellent opportunity to showcase the PowerPort, and how it can create a powerful synergy for other amenities to be offered in the Service Centers. We are excited to be here.”
