

## NEWS RELEASE

# SAN ANTONIO INTERNATIONAL AIRPORT GAINS POWERPORT SERVICE

Brea, CA, August 21, 2006/PR Newswire/ Power Station, LLC

Power Station LLC and the City of San Antonio Aviation Department, operator of the San Antonio International Airport, are pleased to announce the Grand Opening of the latest PowerPort installation on this date. Responding to recent surveys of business travelers, the airport decided to offer additional business services in the terminal, including Internet access. Located in Terminal Two concourse, the PowerPort is the only product of its kind. In a single location, it offers Internet access; secure battery charging for laptops, cell phones and other electronic equipment; portable power rental; and the rental of laptop computers. People with time to spare can rent equipment and work at their leisure in the food court area. Those in a hurry can log on, do their essential business or check their e-mail, and be on their way. This service is offered in conjunction with the Never2Late Business Center, located in Terminal 1.

Mark Webb, Aviation Director for the City of San Antonio, had this to say, "We work very hard to listen to our customers. They clearly called for more high tech services, and access to the Internet. We are delighted to add the PowerPort to our award-winning complement of concessions. This is one more way we are making a better airport, and a better San Antonio."

Henry Mauriss, Chairman of Power Station, said, "We welcome the San Antonio International Airport to the growing list of airports that we serve. This is an award-winning facility with a good mix of business and leisure travelers. We believe that a strong convention market and popular vacation destination like San Antonio will be an excellent opportunity fit for the PowerPort. We have been working for some time with the Business Center operator here to bring this unique mix of services to the patrons of this airport. We are excited to be here."
