

NEWS RELEASE
POWERPORT SERVICE COMES TO
LAMBERT-ST. LOUIS INTERNATIONAL AIRPORT

Brea, CA, December 20, 2005 / PR Newswire / Power Station, LLC

Power Station LLC and the St. Louis Airport Commission, operators of the Lambert-St. Louis International Airport, are pleased to announce the Grand Opening of the latest PowerPort installation on this date. Located in the East Terminal, roughly adjacent to Gate E-12, the PowerPort is the only product of its kind. In a single location, it offers Internet access; secure battery charging for laptops, cell phones and other electronic equipment; portable power rental; and the rental of laptop computers. People with time to spare can rent equipment and work at their leisure in the gate areas, or stop and use a computer while they dine. Those in a hurry can log on, do their essential business or check their e-mail, and be on their way.

Kevin Dolliole, Director of Airports and Chairman of the Airport Commission, had this to say, “We are delighted to add the PowerPort to our complement of concessions in the East Terminal. We are always looking for new and innovative products that will make our travelers’ experience at Lambert more convenient, more productive and more enjoyable.”

Henry Mauriss, Chairman of Power Station, said, “We are excited to add the Lambert-St. Louis International Airport to the growing list of airports that we serve. This is a world-class airport in a world-class city. Lambert is blessed with a good mix of connecting and local passengers. We believe that STL will be an excellent opportunity to showcase the PowerPort, and that savvy travelers will come to expect these services in every major airport around the country. We are excited to be here.”
